COWS

Is it just me, or does anyone find it amazing that during the mad cow epidemic our government could track a single cow, born in Canada almost three years ago, right to the stall where she slept in the state of Washington? And, they tracked her calves to their stalls. But they are unable to locate 11 million illegal aliens wandering around our country. May be we should give them all a COW.

MORE THOUGHTS FROM A SLIPPED GEAR.....

In case anyone has any question about superstition and numbers; we are now believers. As many of you know, we purchased a new work truck; a Freightliner, (Known as a super C). We are not strangers to motorhomes, big trucks and pulling trailers. However, for our peace of mind, we have always carried a small Bible. There was so much confusion when we made the trade for our newer one; it seemed that gesture was overlooked.

Now the story begins. When Billy did the paperwork at the tax office and bought the Texas Plates; they asked him if plates with the numbers 666 was going to bother him? He said he was not superstitious. ...First mistake...We were on a very busy highway in Ohio when we heard a big explosion, The the windscreen filled up with fiberglass fragments of our fender and then about 5 yards of loose dirt from our axle digging into the median. Billy did a wonderful job of keeping us from the oncoming lane and brought it to a stop on the top of the median. After leaving an arm and a leg with the mobile tire truck. We were on our way on a front tire you would not want to put on your lawn mower. We made the very slow 40 miles to a Michelin dealer for two new front tires. Now all was good until the front TV quit when we stopped for the night. With one show behind us we were ½ way into the month. Every stop, the topic was “what happened to your front fender? ” Now we were doing all right until in the middle of the night, we were awakened by the back TV lowering on its own and breaking the granite piece off the top. For the next several days the stove top would go on and off by itself; which demanded that we trip the breaker when we were not in the hauler. Thinking that had to be all; we got ready to move from our place where we had power; to go down to the space we would be working out of. When Billy started the engine; our awing (it is automatic) went flying out . Now we looked like an airplane with only one wing. We had to move and He made his way down all the terraces to our parking spot with the our wing out. We have several friends/customers that come there to help us at this show. By the end of the show they had bought/brought us 2 Gideon Bibles, from two different motels.. We had no other problems.

When we got back first thing Billy did was to take those plates back to the tax office. They replaced them with 777 and he advised the not to leave them in the building over night, because they might need 911!

Just more thoughts from ...a slipped gear
